1. Personal details

Surnames and first name Calvete Manrique Daniel	ID / Passport number 44000252X	
Nationality Espanya	Date of birth 09-08-1970	Sex Male
Address Dept. Fisica. Modul B5-106. Campus Nord. 08034 Barcelona		

2. Current job status

Institution / Organization / company Universitat Politècnica de Catalunya	School Escola Tècnica Superior d'Enginyeria de Camins, Canals i Ports de Barcelona (ETSECCPB)
Department / section / unit Departament de Física	
Post held Associate professor	Start date 01-09-2008
Administrative status Open-ended employment contract	
Commitment Full-time	Specialization (UNESCO codes) 251007 Physical oceanography; 251010 Shore and near-shore processes

3. Education

Undergraduate degree / 1st cycle / 1st and 2nd cycle / 2nd cycle	School	Date of graduation
Ciències Físiques	UB	27-06-1995
Doctoral degree	School	Date of graduation
Ciències Físiques	Universitat Politècnica de Catalunya	29-07-1999

4. Scientific or professional activities prior to current status

Category	Institution	Period
Adjunct lecturer	Universitat Politècnica de Catalunya	16-10-1995 - 31-05-1999
Adjunct lecturer	UPC	16-10-1995 - 31-05-1999
Researcher	UPC	10-02-1996 - 31-01-1999
Postdoctoral research staff	Utrecht University	01-06-1999 - 31-05-2001
Postdoctoral research staff	UPC	01-07-2001 - 31-08-2002
Visitants amb Càrrec a Projectes	Universitat Politècnica de Catalunya	01-07-2001 - 31-08-2002
Adjunct lecturer	UPC	01-09-2002 - 31-08-2003
Adjunct lecturer	Universitat Politècnica de Catalunya	01-09-2002 - 31-08-2003
Research specialist	Universitat Politècnica de Catalunya	01-09-2003 - 31-08-2008

I. Scientific career summary and contribution relevant

I.1 Scientific career summary

My research focuses on the study of coastal geomorphology with the aim of understand the underlying physical processes in the complex dynamics of morphological changes. To do this, I have studied the formation and evolution of wide variety of coastal morphological patterns through numerical modeling. The patterns that I have studied cover a broad range of scales and include the cusps in the coastline, crescentic bars and sandbars on the continental shelf. I have specialized studying the mechanisms and processes involved in the formation of these patterns, their maintenance and eventual destruction. Nowadays, I am focusing my studies on the interactions between different patterns. The results of this research not only increases the scientific understanding of the processes in the coastal region but it may also be useful to improve engineering tools and contribute to coastal management. In this sense some of my research has been directed to theoretical studies on the effect of human interventions (regeneration, dredging) can cause on the coastal environment As part of the research work I have participated in the development of different numerical codes. Some of the codes are developed myself and others result of collaborations with other researchers. The code development and, in general, the scientific studies have been carried out in collaboration with several research groups of international prestige. Throughout my career, I have taken part on 14 research funded projects, I am author of 60 peer-review papers on JCR indexed journals (over 80 scientific publications) and of more than 100 presentations in congresses and symposiums.
